CAREER OBJECTIVE:

Driven by a passion for crafting impactful Salesforce solutions as a Salesforce Developer. Certified in SCA, PD1, and AI Associate, Omnistudio and Health cloud, I bring a unique combination of technical expertise and visionary problem-solving skills. My experience includes working with Apex, Triggers, LWC, Omnistudio and Salesforce CPQ along with hands-on knowledge, enabling me to design and implement efficient and scalable solutions. My unwavering dedication to excellence ensures the delivery of innovative, future-ready systems tailored to exceed organizational aspirations.

EDUCATIONAL QUALIFICATION:

B. Tech Information Technology – Rajalakshmi Engineering College (2019-23)

TECHNICAL SKILLS:

Salesforce Admin, LWC, Apex, triggers, Omni-Studio, Salesforce CPQ.
Java, JavaScript, Advanced Data Structures, Python, HTML/CSS.

CERTIFICATIONS:

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer I
- Salesforce Certified AI Associate
- Salesforce Certified OmniStudio Developer
- Salesforce Health Cloud Accredited Professional

WORK EXPERIENCE:

Cognizant Technology Solutions, Chennai

Salesforce Developer | Sep 2023- Present

- Worked on a Salesforce project for a major U.S.-based healthcare provider, focusing on streamlining their CRM processes, automating member services, and integrating external systems for improved operational workflows.
- Designed an OmniScript guided flow to efficiently capture and store patient details.
- Configured DataMappers for seamless data retrieval and updates across systems, ensuring smooth information flow.
- Developed and integrated FlexCard with OmniScript to enable convenient patient appointment booking.
- Utilized Salesforce Health Cloud platform functionalities i.e. Care coordination, Healthcare providers, Care Program Management.

PROJECTS WORKED:

- **Recruitment Application using Salesforce (April/2023 - Sep/2023)**
 - Built a robust recruitment management system on the Salesforce platform during an internship at Cognizant.

- Leveraged Salesforce Flows, Apex Triggers, and Lightning Web Components (LWC) to automate workflows and streamline recruitment processes.
 - Implemented separate log in for Recruiters and Job seekers using Digital Experience.
- **Interactive website using Data visualization and Data prediction for Cancer Institute, Chennai (Nov/2022 - March/2023)**
 - Designed and implemented an intuitive and user-friendly website for the Cancer Institute, Chennai, enabling better data accessibility and insights.
 - Utilized Python libraries such as Matplotlib, Plotly, and Seaborn to create dynamic, interactive visualizations for analyzing patient data and trends.
- **Nutrition Assistant Application (Feb/2022 - May/2022)**
 - Created an intelligent application under the Nalaiya Thiran program by IBM to assist users in managing their dietary needs effectively.
 - Integrated functionality to provide users with personalized meal and nutrition plans based on their health data, dietary preferences, and goals.
